Problems with NFTs

DOTs with Marvion

Limited utility
& versatility

Our DOTs and technology allows for storage of multi-feature content giving creators the ability to engage in various innovative ways with their fans and customers.

Ownership rights & authenticity

All DOTs undergo KYC and verification before minting to ensure authenticity, complete security of files and metadata after minting with licenses and provenance attached.

Technological & psychological barriers

Our DOTs platform provides a seamless experience for crypto beginners with credit card payment options and simple onboarding

Environmental concerns

Marvion operates on the Binance Smart Chain and Polygon Chain which are energy-efficient blockchains due to Proof-of-Stake (PoS) model

What are Digital Ownership Tokens (DOTs)?

Media and Entertainment DOTs that are used for legal title and ownership to the asset

IP Rights & Terms of Use

Documents that show the **rights to use** and the **ownership** of intellectual property

Content

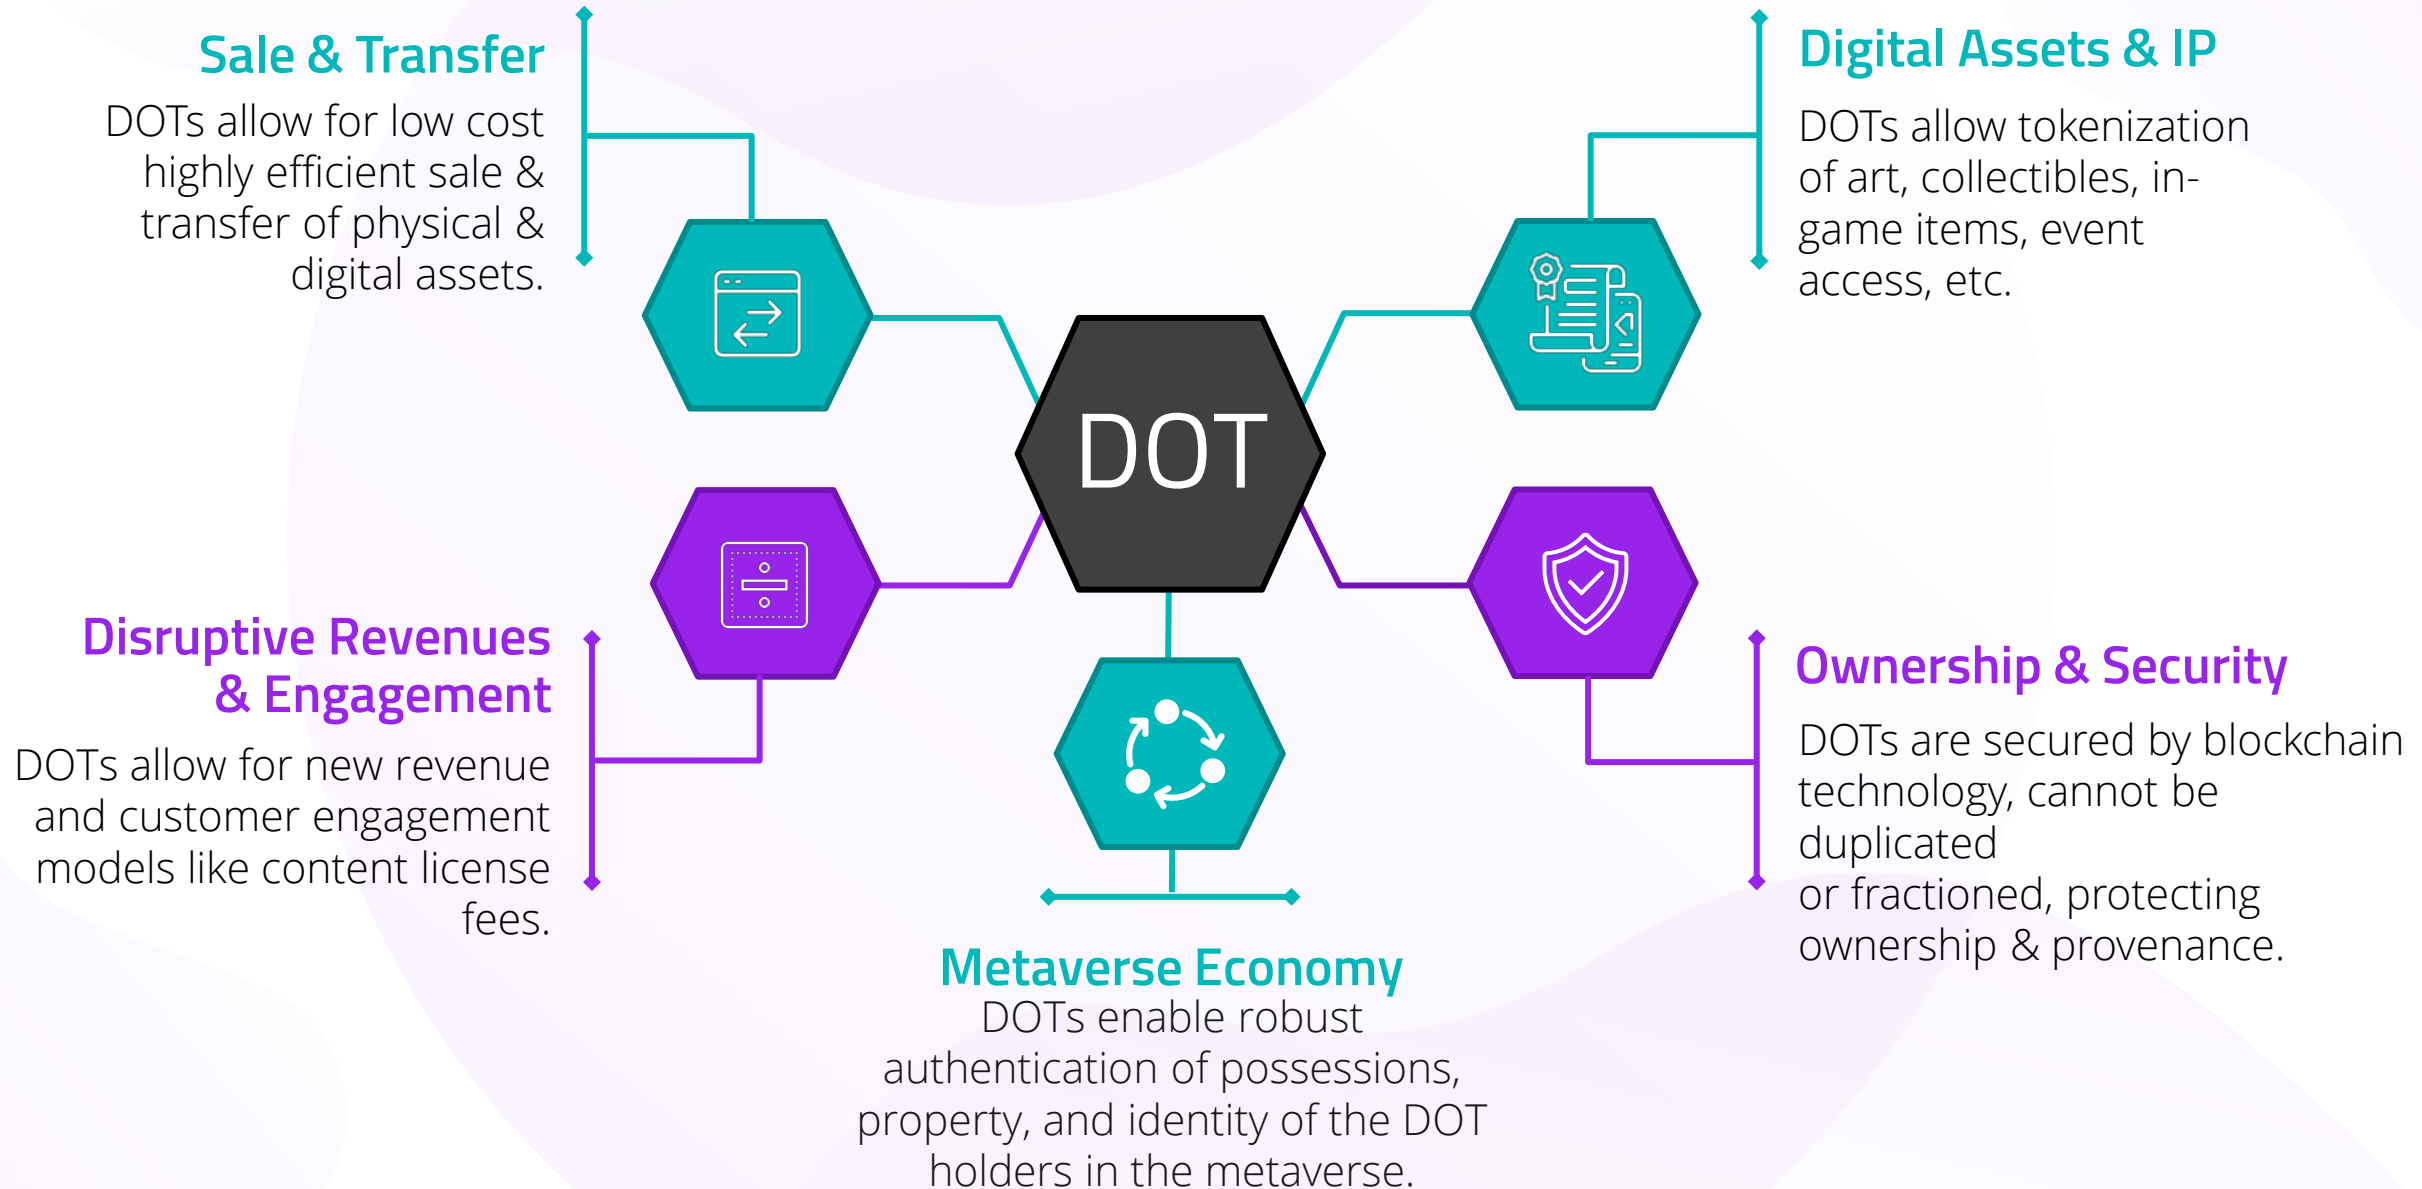

Image/video/music files depending on the type of asset

Ownership title & Provenance

Ownership title that is written on the blockchain to show the **past and current owners**

Utility of DOTs

Marvion's Key Business Units

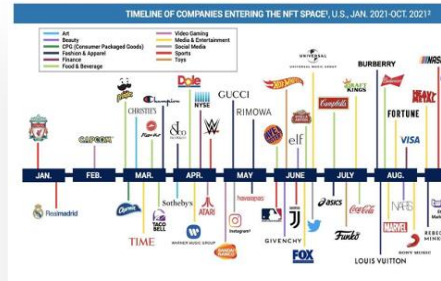

Movie IP Remake

A disruption to the IP licensing business. Marvion created classic Hong Kong Movie IP Remake Digital Ownership Tokens ("DOTs"), each buyer will have a one-time only right to remake the specific movie title into a specific IP right depending on the license embedded in the DOT and have the right to retain all revenues arising from such new production.

Marvion Metastudio

Marvion's NFT marketplace for creators. Full minting and ecommerce engine with custodian, multi-sign wallet functionality, fiat and crypto payment checkout functions. Marvion's MetaStudio is connected to other NFT marketplaces (Opensea, Okex, etc.)

Marvion Web 3.0 Brand Activation

NFT launchpad for businesses/brands to launch their NFT collection to find and build loyal and raving customer communities.

Metaverse AI Bot Technology

Interoperable Metaverse AI Bot Technology to help Metaverse Developers launch and populate their metaverses with NPC characters.

Marvion AI Digital Twin

3D mapping of and real-time feedback of data from manufacturing machines to a Metaverse environment. Facilitates early discovery of machine faults and enables the training of new staff without stopping the factory line.

Business Model

DOT Service Package

Service fees to produce, mint and list DOTs for content creators

Brand Activation

Customize web3 marketing plans for brands

Resale Fees of DOTs

Service fees for reselling of DOTs

Metaverse Service

Provide metaverse consulting & advisory services for companies

Marvion Metaverse – A Virtual World that Creates Real Value

Allowing Development

DOT owners can develop properties such as shops or universities on the virtual land that they own, customizing the environment and serving their communities and customers.

Creating Identities

Each DOT owner can create a PFP as well as a social media page with DOT, building an identity in the Marvion Metaverse.

Building Communities

DOT owners can create forums and events to interact with other DOT owners, building communities for different purposes.

We See Metaverse Differently

Interoperable Metaverse AI Bots for developers to populate their Metaverses easily

Rationale: More metaverses for brands to enter and find customers

Marvion unveiling HKU CampusLand - a joint metaverse initiative with Marvel Digital AI and the University of Hong Kong
